

Water Monitoring for Supply and Licence Requirements

Compliance Monitoring (CM) provides best-practice solutions to industry for all their water monitoring services. These are achieved by the following:

- Focus on safety, health and the environment.
- All water sampling is conducted in accordance with the Australian Standard (AS) 5667 series of standards and all field measurement equipment is calibrated to ensure integrity of results.
- CM is the only WA-based company to hold NATA accreditation for sampling waters in accordance with the AS 5667 series of standards;
- CM achieved a sample collection KPI result of 99.5% for all accessible samples over a 12 month period for a major monitoring contract in the Pilbara.
- CM uses a fleet of specifically equipped vehicles that are certified to access multiple mine sites across Western Australia.
- CM has extensive experience working in high security areas (such as major sea ports) and conforming to the highest levels of OHS regulations and procedures.
- CM received a nomination from the Chamber of Commerce and Industry Western Australia (CCIWA) for the Safe Work Awards in 2013 after their onsite audit of our safety systems.

Potable water Groundwater Surface water
Contaminated water Wastewater

CXM uses a number of industry leading instruments from high flow pumps to low flow pumps, multi-point water meters and multi-parameter water meters.
